### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 18 November 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 7-12, 20-24 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 1,131,553 to Rethorn, cited in previous Office action.

The Rethorn '553 patent discloses a rake comprising a head (15), an elongate handle (17) extending from the head, a plurality of parallel, spaced-apart, flexible tines (16) extending from the head opposite the handle, a brace (24) movable along the tines from a first position to a second position, thereby changing the effective stiffness of the tines (see Fig. 2), and a locking device (28) releasably securing the brace to the head in the first and second positions. The brace (24) moves relative to the handle as the brace moves between the first and second positions. The spacing between the tines remains unchanged as the brace moves between the first and second positions.

Regarding claims 2, 7-12, 21-24: Each of the tines (16) extend through separate openings (25) in the brace. The locking device includes interlocking protrusions (18, 20). The locking device moves the brace to positions between the first and second position (i.e., inherently, the brace (24) moves between the solid line and phantom line positions indicated in Fig. 2). The locking device comprises a rotatable knob (28). The tines (16) are unremovable from the head

Art Unit: 3671

(15). The handle extends to the tines. The head (15) includes a socket for receiving the handle (see Fig. 2).

3. Claims 1 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,527,077 to Bickar.

The Bickar '077 patent discloses a rake comprising a head (20), an elongate handle (14) extending from the head, a plurality of parallel, spaced-apart, flexible tines (22) extending from the head, a brace (10) movable along the tines between a first and second positions, and a locking device (70L) for releasable securing the brace in the first and second positions. The brace moves relative to the handle as it moves between the first and second positions, and the spacing of the tines remains unchanged as the brace moves.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-6, 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 1,131,553 to Rethorn.

The Rethorn '553 patent discloses the claimed invention, as stated in paragraph 2 above, except for the particularly claimed shapes or materials of construction. However, it would have been an obvious matter of design choice to construct the rake with T-shapes or cylindrical shapes or of plastic and/or metal materials.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
